BASIC-ABSTRACT:

The toy kitchen consists of one or more separate, matching modules with one or more kitchen elements. The geometric shape of the modules, especially to the right, left and rear, is such that the modules can be played with individually or together as round, oval, polygonal and linear built-in kitchens.

The single modules can be firmly joined by one or more hooked connections (V1,V2) such as hook and loop fastener strips.

USE - The kitchen units, such as oven, cooker hob, washing machine, dishwasher, refrigerator, shelves, drawers and microwave oven, can be played with by 2 to 10 year old children standing or kneeling.
